

# TRUSTED SYSTEMS FOR UPSTREAM, MIDSTREAM, AND DOWNSTREAM

Delivering quality, durability and long-term value.

## BUILT FOR PRODUCTION PERFORMANCE

Petrosmith delivers engineered vessels, tanks, and modular systems designed to keep oil and gas operations running efficiently. Every build is customized to site conditions, flow requirements, and production needs, ensuring dependable performance from day one.

- ASME and API certified **production vessels**
- **Heater treaters, gunbarrels, and separator packages**
- **Storage tanks** for crude, condensate, and water
- **Modular and skid mounted** configurations
- **Tailored layouts and pressure ratings** for each application

## PARTNER WITH PETROSMITH

Petrosmith is committed to **supporting the oil and gas industry with reliable, code compliant equipment** built for efficiency, safety, and long term performance. When you need a fabrication partner that understands production demands, trust Petrosmith to deliver.

## DESIGNED TO WITHSTAND THE FIELD

Oilfield operations demand strength and reliability. Petrosmith **fabrication is engineered to endure high pressure, temperature, and corrosive environments**. Each unit is built with heavy duty materials, protected with in house coatings, and fully hydro tested to ensure dependable performance in the field. Our focus on quality and durability **helps operators minimize downtime and extend the life of critical equipment**.

## OUR MANUFACTURING ADVANTAGE

With more than **400,000 sq ft** of integrated manufacturing space, Petrosmith provides full control over quality and schedule. **We handle every phase in house from engineering and welding to assembly, coating, and testing** to deliver equipment built right and delivered on time.

## WHAT SETS US APART

Our team understands oilfield production from the ground up. Whether supporting new well development or facility upgrades, Petrosmith combines technical expertise and proven field experience to deliver **results that meet operational goals**.

- Collaborative **design support and project management**
- Fabrication aligned to field installation needs
- **Scalable solutions** for single or multi unit programs
- **Trusted performance** across major oil and gas basins
