

## TRUSTED SYSTEMS FOR UPSTREAM, MIDSTREAM, AND DOWNSTREAM

Delivering quality, durability and long-term value.

### BUILT FOR PRODUCTION PERFORMANCE

PetroSmith delivers high-quality engineered vessels, tanks, and modular piping systems designed to keep oil and gas operations running efficiently. Every build is customized to our customers' needs and engineered in accordance with site conditions, flow requirements, and production needs.

- ASME stamped **production vessels**
- **API 12F and API 650** monogrammed tanks
- **Separators, heater treaters, gas scrubbers, vapor recovery towers,** and all types of production equipment
- **Storage tanks** for produced oil, water, and condensate
- **Modular and skid mounted** configurations available for vessels and piping systems

### PARTNER WITH PETROSMITH

PetroSmith is committed to **supporting the oil and gas industry with high-quality, reliable, code compliant equipment** built for efficiency, safety, and long term performance. When you need a fabrication partner that understands production demands, trust PetroSmith to deliver.

### DESIGNED FOR APPLICATION

Oilfield operations demand strength and reliability. PetroSmith products are **engineered for pressure, temperature, and corrosive environments across every basin**. Each unit is built with PVQ steel, hydro tested, and finished in-house to customer specifications, interior coatings and exterior paint included, for dependable field performance. Our end-to-end quality **minimizes downtime and extends equipment life**.

### OUR MANUFACTURING ADVANTAGE

With more than **400,000 sq ft** of integrated manufacturing space, PetroSmith provides full control over quality and schedule. **We handle every phase in house from engineering and welding to assembly, coating, and testing** to deliver equipment built right and delivered on time.

### WHAT SETS US APART

Our team understands oilfield production from the ground up. Whether supporting new well development and facility design, or upgrades and retrofits to existing facilities, PetroSmith combines technical expertise and proven experience to deliver **results that meet our customers' operational goals**.

- Collaborative **design support and project management**
- Fabrication aligned to promote efficient field installation
- **Scalable and modular solutions** for single or multi-unit programs
- **Trusted performance** across all major oil and gas basins
