

ELITE MANUFACTURING FOR DATA CENTER INFRASTRUCTURE

Tanks, vessels, modular solutions - built to perform.

SOLUTIONS THAT SCALE

Built for mission-critical operations, our products directly support key infrastructure systems for hyperscale and modular builds.

- **Fuel storage tanks** for generator backup systems
- **Pressure vessels** for HVAC and thermal cooling
- Modular **water tanks and filtration systems**
- Skid-mounted assemblies for **streamlined installation**
- **Engineered solutions** tailored to your facility's needs

PARTNER WITH PETROSMITH

We understand what's at stake in your operations—uptime, precision, and speed. That's why **we offer turnkey support from concept through completion**, including complete assembly and quality verification before delivery.

THE DATA CENTER DEMAND

Today's data centers require resilient infrastructure that scales fast and performs under pressure. From thermal management and backup power to water treatment and structural integration, **Petrosmith is equipped to deliver.**

OUR MANUFACTURING ADVANTAGE

With over **400,000 sq ft of vertically integrated space**, Petrosmith brings full-scope fabrication and assembly under one roof. We're ASME, API, and UL 142 certified, with advanced capabilities and a seasoned team ready to move from design to delivery.

WHAT SETS US APART

- In-house **engineering, design & project management**
- CNC plasma cutting, robotic & sub-arc welding
- Fabrication for **vessels up to 16 ft diameter, 60 ft length, 100,000 lbs**
- Hydro testing, coating, blasting, and QA in-house
- High-bay assembly areas for **large-scale modular solutions**
