

ENGINEERED SOLUTIONS FOR WATER TREATMENT SYSTEMS

Built to Spec. Manufactured to Perform.

CUSTOMER-DRIVEN SOLUTIONS

All products are fabricated to customer specifications and built for integration into larger water treatment systems.

- ASME Section VIII-certified **carbon filtration vessels**
- Pressure-rated tanks for **PFAS/PFOA removal systems**
- Modular **filtration and water storage skids**
- Hydropneumatic, condensate polishing, and chemical **storage tanks**
- Fabrication matched to **your project flow rates, pressures, and layouts**

PARTNER WITH PETROSMITH

We're here to support your success by **delivering reliable, code-compliant fabrication tailored to your project requirements**. From engineering and fabrication to QA testing, our team ensures every component aligns with your standards and integrates smoothly into your system.

WATER QUALITY REQUIRES RELIABLE STRENGTH

Petrosmith partners with water treatment providers as a dedicated manufacturing resource—producing tanks, vessels, and modular systems based entirely on your project specs. Our role is to support yours with **compliant, high-quality fabrication**.

OUR MANUFACTURING ADVANTAGE

With over **400,000 sq ft of vertically integrated space**, Petrosmith brings full-scope fabrication and assembly under one roof. We're ASME, API, and UL 142 certified, with advanced capabilities and a seasoned team ready to move from design to delivery.

WHAT SETS US APART

- In-house **engineering, design & project management**
- Corrosion-resistant coatings and linings for harsh environments
- Fabrication for **vessels up to 16 ft diameter, 60 ft length, 100,000 lbs**
- Hydro testing, coating, blasting, and QA in-house
- High-bay assembly areas for **large-scale modular solutions**
